

2020

TRIAL – YEAR 12 HIGHER SCHOOL CERTIFICATE EXAMINATION

Mathematics Advanced

General Instructions

- Reading time 10 minutes
- Working time 3 hours
- Write using black pen
- Calculators approved by NESA may be used
- A reference sheet is provided at the back of this paper
- In Questions 11-16, show relevant mathematical reasoning and/or calculations

Total marks:

Section I – 10 marks (pages 2-5)

100

- Attempt Questions 1-10
- Allow about 15 minutes for this section

Section II - 90 marks (pages 6-34)

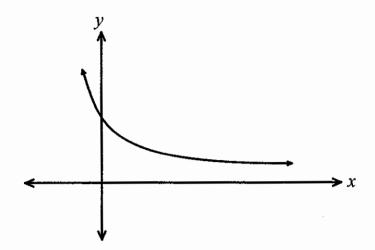

- Attempt Questions 11-16
- Allow about 2 hours and 45 minutes for this section.

Section I - 10 marks

Allow 15 minutes for this section

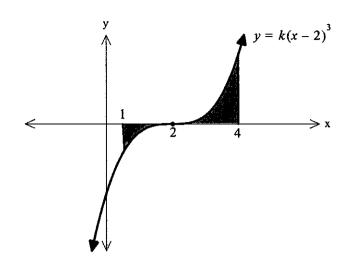

- 1. Which expression is equal to $\int \tan^2 x \ dx$?
 - (A) $\frac{\tan^3 x}{3} + C$
 - (B) $\tan x x + C$
 - (C) $\tan x + x + C$
 - (D) $\sec^2 x + C$
- 2. $\frac{d}{dx} \log_e \frac{4x^2 9}{2x 3}$ is equal to which of the following?
 - $(A) \quad \frac{6}{2x-3}$
 - $(B) \quad \frac{2}{2x+3}$
 - (C) $\frac{6(2x+3)}{(2x-3)^2}$
 - (D) $\frac{6(4x+1)}{(2x-3)^2}$
- 3. Which of the following could be a primitive for $f'(x) = \frac{x}{e^{x^2 8}}$?
 - (A) $-\frac{1}{2}(e^{x^2-8}) + 8$
 - (B) $\frac{1}{2} \ln(e^{x^2-8}) + 8$
 - (C) $\ln(e^{8-x^2}) 8$
 - (D) $-\frac{1}{2}(e^{8-x^2})-8$

4. For the curve shown, which inequalities are correct?

- (A) $\frac{dy}{dx} > 0$ and $\frac{d^2y}{dx^2} > 0$
- (B) $\frac{dy}{dx} > 0$ and $\frac{d^2y}{dx^2} < 0$
- (C) $\frac{dy}{dx} < 0$ and $\frac{d^2y}{dx^2} < 0$
- (D) $\frac{dy}{dx} < 0$ and $\frac{d^2y}{dx^2} > 0$
- 5. Results for a test are given as z-scores. In this test Angela gained a z- score of 3. The test has a mean of 55 and standard deviation of 6. What was Angela's actual mark in this test?
 - (A) 58
 - (B) 73
 - (C) 64
 - (D) 67

6. The graph with the equation $y = k(x-2)^3$ is shown below, for some positive constant k.

If the area of the shaded region is 34, what is the value of k?

- (A) $\frac{136}{15}$
- **(B)** 8
- (C) 4
- (D) $\frac{34}{9}$
- 7. The time, T, in seconds that divers can hold their breath is normally distributed with $\mu = 120$ and Var(T) = 400. In what range of time length would you expect to find the middle 95%?
 - (A) $100 \le x \le 140$
 - (B) $80 \le x \le 160$
 - (C) $60 \le x \le 180$
 - (D) $40 \le x \le 200$

- 8. The exact value of $I = \int_{1}^{2} \frac{\ln x}{x} dx = \frac{1}{2} (\ln 2)^{2}$. The approximation of I using the Trapezoidal Rule with 2 function values is
 - (A) smaller by 28%
 - (B) larger by 28%
 - (C) smaller by 72%
 - (D) larger by 72%
- 9. Given a function $f(x) = \frac{x}{x^2 5}$

Which of the following statements is true?

- (A) f(x) is even and one-to-one.
- (B) f(x) is even and many-to-one.
- (C) f(x) is odd and one-to-one.
- (D) f(x) is odd and many-to-one.
- 10. The amount M of certain medicine present in the blood after t hours is given by $M = 9t^2 t^3$ for $0 \le t \le 9$.

When is the amount of medicine in the blood increasing most rapidly?

- (A) t = 0
- (B) t = 9
- (C) t = 6
- (D) t=3

END OF SECTION I

Section II- Extended Response

Attempt Questions 11-16.

Allow about 2 hours and 45 minutes for this section.

Question 11(15 Marks)

a)	Differentiate	e the following	
	(i)	y = (4x - 5)(4x + 5)	1
			•••••

c) The graph of  $f(x) = x^2 e^{kx}$  and  $g(x) = -\frac{2xe^{kx}}{k}$  and the line x = 2 is drawn below, where k is a positive constant. f(x) = g(x) at only one point, that is at (0,0).

Let A be the area of the region bounded by the curve y = f(x), y = g(x) and the line x = 2.

(i) Write down a definite integral that gives the value of A.

(ii) The function f(x) from part (i) is given by  $f(x) = x^2 e^{kx}$ , where k is a positive constant. Show that  $f'(x) = xe^{kx}(kx + 2)$ .

.....

(iii)	Using the results of part (i) and (ii), or otherwise, find the value of $k$ such that 2
	$A = \frac{16}{k}.$

End of question 14

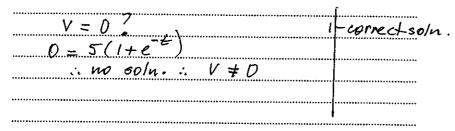

a) The velocity v of a particle in metres/seconds is given by the formula

 $v = 5(1 + e^{-t})$ , where t is time in seconds.

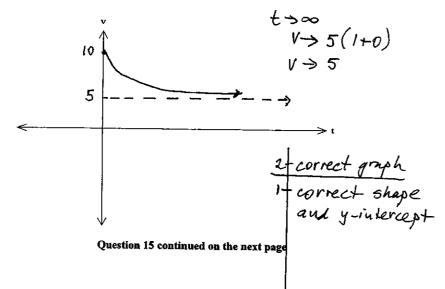

Find the initial velocity of the particle.

Is the particle ever stationary? Justify your answer.

Sketch the graph of the velocity.

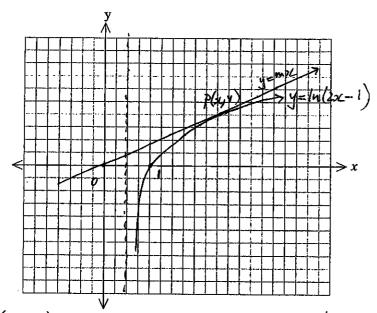

Find the total distance travelled by the particle in the first 5 seconds.
